

## **What is Leadership White Mountains?**

Leadership White Mountains is a community leadership development program of the Show Low Chamber of Commerce. Its purpose is to identify community leaders of diverse backgrounds and help develop their potential. We familiarize up-and-coming leaders to the problems and opportunities that face the White Mountain and well as expose them to the processes, programs, and challenges for the individual involvement in the community. The participants will be chosen by a steering committee, comprised of community and business leaders. The most important factor in participant selection is the identification of those individuals who are most likely to utilize their leadership skills for the long-term benefit of the White Mountain area. It is essential that participants and their respective employers are willing to make the time commitment necessary. A participant is expected to attend ALL sessions for successful completion of the program.
